PROFESSIONAL SUMMARY

Generative AI Engineer and BCA graduate with hands-on experience building AI-driven applications using Python, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and Natural Language Processing (NLP). Skilled in LangChain, vector databases, semantic search, and API integration, with a track record of improving response accuracy and cutting manual review effort by up to 30% in applied projects. Strong foundation in data structures, algorithms, and software development practices.

TECHNICAL SKILLS

Generative AI & NLP: LLMs, Prompt Engineering, RAG, Embeddings, Semantic Search, Vector Search, Model Evaluation (DeepEval)

Programming Languages: Python

AI/ML Frameworks: LangChain, Langflow

Databases: MongoDB, SQL

Developer Tools: Git, GitHub, VS Code, Power BI

API & Development: REST APIs, Postman, API Integration

INTERNSHIP

Internship Trainee — Testleaf Software Solutions Pvt. Ltd

May 2026 – Aug 2026

- Built and deployed 2 AI-driven applications in Python that integrated LLMs with external data sources to generate context-aware responses for end users.
- Implemented RAG pipelines and iteratively refined prompts, improving response relevance by an estimated 20% based on internal evaluation.
- Applied vector embeddings and semantic search across a document corpus of 500+ records, benchmarking output quality with DeepEval.
- Worked with team members, following Git-based version control and code review best practices to deliver production-ready features within project timelines.

PROJECTS

AI Resume Screening Assistant

- Developed and optimized a RAG-based AI resume screening solution using TypeScript and Node.js to semantically match 60+ resumes against job requirements, reducing manual screening time by 30%.

Intelligent PDF Question-Answering System

- Engineered and deployed a TypeScript + React.js document Q&A application supporting PDF, DOCX, and TXT, using embeddings and semantic retrieval to deliver accurate responses across 50+ test queries.

Corevia AI – Intelligent Enterprise Knowledge Assistant

- Designed and implemented an AI-powered enterprise knowledge assistant using TypeScript, React.js, Node.js, RAG, and Langflow, integrating document processing, embeddings, vector search, and LLM-based generation for reliable, context-aware responses.

EDUCATION

Bachelor of Computer Applications (BCA)

Auxilium College (Autonomous), Vellore | 2025 | CGPA: 7.51%

ACHIEVEMENTS

- Participated in the 'International Conference on Information and Communication Technology – ICICT 23.
- Attended a Workshop on Employability skills conducted by Unnati Foundation .

LANGUAGES

- English (Proficient) • Hindi (Proficient) • Tamil (Native)
